

## **JLG Forklift Part**

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora embarked on a cross country trip in their RV. Freshly retired, after spending many years working with his brother to manufacture their crane business into an industry leader, John had no idea that fateful trip would permit JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling technologies was the end result of a road trip.

All through their journey, John reacquainted himself with previous business associates along the way. In combination with these conversations and a noteworthy event; two workers were unfortunately electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John uncovered a substantial market for a product that could quickly and safely lift people in the air to accomplish maintenance and other building functions.

Upon returning from their travels, John formed a partnership with two friends and bought a metal fabrication business in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty personnel, they created and sold the first JLG aerial work platform. The business incorporates some of the simple design elements of that original lift into existing models.

JLG forklifts have come a long way from the time when Mr. John L. Grove came back to town from his cross-country road trip and since the initial aerial work platform debuted on the market. Nowadays, the company proudly continues to expand itself into numerous markets worldwide and develops new products to make sure customers are capable of being more efficient and perform in the workplace within a safer atmosphere.
