

## Pulp Clamp

Pulp Clamps - There are several different forklift accessories which can be utilized to make lift trucks far more useful. Snowplow attachments could be mounted onto the front part of a lift truck. A scoop bucket could be helpful if the task requires moving soil, sand, snow, or gravel. A double block handler permits the person operating the forklift to lift\carry a couple of loads and stack them beside each other. Several of these accessories are really ideal for light to medium tasks.

Another forklift attachment is the package lift clamp, that could carry and move really heavy pallets. Furthermore, pallet crane forks may be utilized so as to carry and transfer pallets with an overhead crane. A drum clamp accessory is useful for transporting heavy drums from one place to another without having to use a pallet. Forklift mounted hoppers enable material to be moved and dumped with out having to handle it by hand. These hoppers when the bumper is released are self dumping.

Accessible accessories now include accessories that enable a lift truck to do the task of a commercial mop or broom. These particular accessories are most frequently used cleaning parking lots, storehouse floors, and boat docks. Forklift mounted platforms are accessible equipped with twin entry doors and can be attached to transport personnel from one locale to another. The mounted platform attachment is ideal for reaching areas which are hard to access, particularly if you have products or materials stored in out of the way places or really up high.

It is a handy option to install lift truck attachments that could instantly transform a lift truck right into a mobile crane unit. This equipment is extremely useful in terms of maneuvering loads which can be unsteady or tricky. This attachment could either be telescopic, mounted on the carriage itself, or be fixed or even lift truck mounted.
